Jettribe is a true core brand for the watercraft enthusiast since 1996. We've lived, breathed and loved the sport since Kawasaki 550 stand-ups were king, neon and fluorescent colors were cool (And they are back "in" now??), and MC Hammer's running man was the move of all moves! We were drying off our mullets after every ride. Though the times are a-changing, our mission has remained the same. With our passion and love for the watercraft industry and lifestyle, we aim to better the industry through our products and personal commitment.

In the last few years, Jettribe has stepped up our game by having two Jettribe

In the last few years, Jettribe has stepped up our game by having two Jettribe Race Rigs for the Jettribe West Coast Series and an additional rig for the East coast events. From California to Florida, our Jettribe Race Rig brings our products to the racers, giving away prizes, providing rider support at virtually every race event and freeride event in the USA! Internationally, Jettribe has been taking our Jettribe USA Team overseas to more countries than ever - including China, Thailand, Martinique, and Europe.

At Jettribe we are stoked and proud to have the opportunity be the title sponsor of these events: Jettribe Asia Invitiational, Jettribe West Coast National Tour, Jettribe Euro Jetski Tour, Nordic Jetski Championship, and the Jettribe Doncaster Event. Jettribe is totally grateful to have been the 2014 title sponsor of IJSBA World Finals at Lake Havasu City, Arizona. Jettribe is now the official gear of the China National Team and the Thai National Team. We are also the official partners of the Asian Aquabike Open, the Russky Grand Prix, and King's Cup Jet Ski World Cup, in addition to providing the official gear and apparel for Kings Cup.

The Watercraft industry evolved over the years. Personal Watercraft have become bigger, faster, and more powerful, but the industry's riding gear has remained largely unchanged for the last decade. We strive to evolve the gear to keep up with the PWCs and the needs of the riders. At Jettribe we design, test, and develop ride gear year-round. Our ride gear are designed with the racer in mind, but still at home with the weekend warrior. We want a better experience for the rider, in comfort, durability, and protection.

At Jettribe, we build the products that we would use ourselves. Our prime mission is to provide the best quality and performance for the PWC rider first, and consider sales volumes later. The Jettribe model is to release quality products that we can truly stand behind. We are truly excited that Jettribe is considered to be one of the fastest growing PWC gear companies. We support the PWC rider and thankfully, the riders in turn support Jettribe!

The Jettribe Family!

The Jettribe Wetsuit John & Jacket Race Suit is built, designed and engineered for the Personal Watercraft riders' riding stance, not for laying down like a surf suit. Jettribe Race Suits are built for the PWC rider's maximum comfort, flexibility, warmth and mobility:

- Built with 3mm panels for warmth and 2mm panels for high movement areas like the inner arms and legs
- · Wetsuit John with matching Jacket included
- · All seams have our interlocking flat stitch to provide a watertight seal and maximum comfort against the skin
- · Carefully selected neoprene for the right combination of thickness to retain a rider's body heat in various conditions
- Neoprene is a closed, high density foam made up
 P.6 of thousands of tiny air bubbles (cells) which provide an insulation barrier to slow down the conduction of heat
- · John/Jacket Race Suits are engineered with the understanding that constant rider movement over-generates body heat while in water and open air, as opposed to surf wetsuits that are designed to always be in water.

UR-20 RACE VEST DNA

The Jettribe UR-20 Side Entry Vest is an excellent all-around vest for free riding, freestyle, closed course racing, offshore endurance racing and naturally, for recreation PWC riding as well.

We have incorporated our custom designed pre-molded foam, unique only to our Jettribe UR-20 race vests. What is it? The preformed mold adds the ultimate in flexibility to conform to the contour of the rider's body, instead of forcing a flat piece EVA foam to wrap around a rider's chest. Plus, our second heat and pressure compression process allows us to take a 4-inch EVA foam panel and compress it down to a 2 inch thickness. This process allows for a lighter and more comfortable race vest with maximum flotation.

We are especially proud of the UR-20. We have taken the best of all vests details and built them into this one vest. Every small detail has been carefully considered. For example, all of the webbings are tacked down with a zig-zag bar tack, rescue handles are wrapped underneath, then bar tacked, then finished off with a box stitch. All webbing exit openings are reinforced with a TPR collar for durability. Most of these details are over-looked by others, but not by the Jettribe design team.

Our Jettribe race vests have been proven with top professional racers throughout the world. Some of the features that separate our vest from the rest are: triple rescue handles, back protection compatible, triple 38mm buckles and webbing, interchangeable velcro flag patches, removable heavy duty PWC lanyard D-ring, PLUS the rear race collar attachment.

The Jettribe UR-20P Side Entry Vest is the next evolution in our UR-20 vest series. In addition to being an excellent all-around vest for free riding, freestyle and closed course racing, this vest has an incorporated name plate panel for customization. Show off your Name and Race Number from your local training spot all the way to the Lake Havasu World Finals.

The customized vinyl lettering (sold separately) is heat-transfered directly on your removable back name plate. Even if you don't choose customization, the matching back plate is securely attached with velcro around the entire perimeter of the plate.

The vest also incorporates our custom designed pre-molded foam, unique only to our Jettribe UR-20 race vest series. What is it? The pre-formed mold adds the ultimate in flexibility to conform to the contour of the rider's body, instead of forcing a flat piece EVA foam to wrap around a rider's chest. Plus, our second heat and pressure compression process allows us to take a 4-inch EVA foam panel and compress it down to a 2 inch thickness. This process allows for a lighter and more comfortable race vest with maximum

XXL	50-52" (127.00-132.08cm)	

The Jettribe RS-18P Side Entry Vest is the next evolution in our "RS" vest series. In addition to being an excellent all-around vest for free riding, freestyle and closed course racing, this vest has an incorporated name plate panel for customization (sold separately). Show off your Name and Race Number from your local training spot, all the way to the Lake Havasu World Finals.

The Jettribe RS-18P is a Side-Entry Impact Vest. The important built-in feature of this vest is the high-density, EVA compression molded chest plate. The plate in the RS-18P is tougher, stronger and offers more protection than ever before to reduce chest impact effects.

The back panel has an incorporated pre-molded foam piece, unique to our Jettribe UR and RS vest series. The pre-formed mold adds the ultimate in flexibility to conform to the contours of the rider's back, instead of forcing a flat piece of EVA foam to wrap around a rider's body. Plus, our second process of heat and pressure compression allows us to take a 4-inch EVA foam panel and compress it down to a 2 inch thickness. This process allows for maximum flotation for a lighter and more comfortable race vest.

We are especially proud of the RS-18P, taking the best features of all vests and building them into this one vest. Every small detail has been carefully considered. For example, all of the webbings are tacked down with a zig-zag bar tack, rescue handles wrapped underneath and bar tacked, then finished off with a box stitch. Most of these details are over looked, but not by the Jettribe design team. Our Jettribe race vests have been proven with top professional racers throughout the world.

KIDS JOHN & JACKET WETSUIT

The Jettribe Kid's Wetsuit John & Jacket Race Suit is built, designed and engineered exactly like our adult race suits. They are created for the junior riders' maximum comfort, flexibility, warmth and mobility:

- Built with 3mm panels for warmth and 2mm 4-way stretch panels for high movement areas like the inner arms and legs
- · All seams have our interlocking flat stitch to provide a watertight seal and maximum comfort against the skin
- · Carefully selected neoprene for the right combination of thickness to retain a rider's body heat in various conditions
- · Neoprene is a closed, high density foam made up of thousands of tiny air bubbles (cells) which provide an insulation barrier to slow down the conduction of heat
- · Like our adult suits, the Kids John/Jacket Race Suits are engineered with the understanding that constant rider movement over-generates body heat while in water and open air, as opposed to surf wetsuits that are designed to always be in water.

KID WETSUIT FIT CHART

KIDS NEOPRENE TOUR COAT

The Jettribe Kids Neoprene Tour Coat, or Moto Jacket, is designed exactly like our adult jackets, to warm junior riders on those chilly days on or off the water.

- Made as additional overlayer to help keep your core temperature high, primarily in your chest area
- · Protects from water splashes while on your ski and the cold, high winds when flying across the water at 80MPH.
- · Oversized cut to be worn over the life vest and wetsuit
- · Pre-Curved elbow joints for added comfort and flexibility
- · Proprietary compression process makes 5mm neoprene until 3/3mm for a lighter feel and better cold protection
- · Bold and oversized graphics are printed by gas fusion process, so material is soft and light to the touch without cracking or fading

FUSION INK; NO CRACKING

3/3 NEOPRENE

AMPHIB RIDE SHOES

Jettribe Amphib Water Shoe is a hybrid of what our customers love most about our shoes. The top is a neoprene water shoe with a wide-point adjustable velcro

The Rubber TPR over-molded sole is designed to keep you on your feet and comfortable when walking from water to land. The built-in drain holes prevent water-logged feet. Run from your ski to the shore, then back again for more action on the water!

Unisex shoe, based on Men's sizing.

The Jettribe Rescue Tow sled is designed to be towed by a PWC (Jet Ski) for a fast rescue. The Jettribe Rescue PWC Tow Sled is lightweight and tough. The OLS® technology is Patented in the USA and other countries. The high tech materials and construction are unique. There is no other like it in the world.

There is an internal aluminum honey comb stringer system (DAS). This makes it extremely light compared to a traditional rescue board. This makes the sled fast and maneuverable. The tow-behind Jetski rescue sled is designed for use behind Personal Water Craft (PWC) to react quickly and arrive on time to a swimmer in trouble or a downed rider on a race course. Also, the towable rescue sled is the perfect equipment for tow in surfing.

Worldwide professional associations rely on the Rescue Sled as their vital rescue equipment: The Peruvian National Police, Surf Rescue Division, China Closed Course PWC Racing, Yamaha of Thailand PWC Safety, and USA IJSBA West Coast Closed Course Racing.

- · Dual aluminum stringers and patented ultra light resistant
- Gore-Tex microfiber air venting
- Padded handles and "last chance" loop
- · Quick release attachment
- · Soft edge protector all around
- · Slick white fast bottom
- · Anti-Slip Grip deck padding

With UV Protection, breathable and quick-drying, the Jettribe Rashguard is constructed with 20% Spandex and 80% polyester fabric, which provides lightweight, stretchy, and easy movement for riding PWC and other water activities. The comfort, fit, and design offer ultimate warmth and sunburn prevention for hours of PWC riding.

FLAT LOCK STITCHING -

Flatlock stitching is an ideal stitching Flatlock stitching is an ideal stitching style for watercraft riding gear. The parallel stitching method is perfect for riding gear due to its strength and flexibility. Open to water penetration, the unique seam offers high performance and fast drying times, that complement the rashguard's light, breathable fabric. Count on flat-lock stitching to keep your long or short sleeved guard wearing great every day. The tight fit provides optimal staying power on even the roughest waters.

The Jettribe rashguard's fade-resistant coloring and design is made to enhance your time on the water.

Make the most out of your next ride with this high performance and comfortable rashguard.

ULTRA VIOLET SUN PROTECTION

LADIES RACE SUIT DNA

LADIES RACE SUIT

The Jettribe Ladies Wetsuit Jain & Jacket Race Suit has a custom female contoured cut to better fit a woman's physique. The design is still built, designed and engineered for the Personal Watercraft riders' riding stance, not laying down like a surf suit. We design our Jettribe Race Suits for the PWC's maximum comfort, flexibility, warmth and mobility:

- Built with 3mm panels are for warmth and 2mm panels for high movement areas like the inner arms and legs
- Female contoured cut around chest, thighs and hips to better fit a woman's physique
- All seams have our interlocking flat stitch to provide a watertight seal and maximum comfort against the skin
- Carefully selected neoprene for the right combination of thickness to retain a rider's body heat in various conditions
- Neoprene is a closed, high density foam made up of thousands of tiny air bubbles (cells) which provide an insulation barrier to slow down the conduction of heat
- John/Jacket Race Suits are engineered with the understanding that constant rider movement over-generates body heat while in water and open air, as opposed to surf wetsuits that are designed to always be in water.

LADIES UR-20P SIDE ENTRY VEST

The Jettribe Ladies UR-20P Side Entry Vest is the next evolution in our UR-20 vest series. In addition to being an excellent all-around vest for free riding, freestyle and closed course racing, this vest has an incorporated name plate panel for customization. Show off your Name and Race Number from your local training spot all the way to the Lake Havasu World Finals.

The customized vinyl lettering (sold separately) is heat-transfered directly on your removable back name plate. Even if you don't choose customization, the matching back plate is securely attached with velcro around the entire perimeter of the plate.

The vest also incorporates our custom designed pre-molded foam, unique only to our Jettribe UR-20 race vest series. What is it? The pre-formed mold adds the ultimate in flexibility to conform to the contour of the rider's body, instead of forcing a flat piece EVA foam to wrap around a rider's chest. Plus, our second heat and pressure compression process allows us to take a 4-inch EVA foam panel and compress it down to a 2 inch thickness. This process allows for a lighter and more comfortable race vest with maximum flotation.

Our Jettribe race vests have been proven with top professional racers throughout the world. Some of the features that separate our vest from the rest are: triple rescue handles, back protection compatible, triple 38mm buckles and webbing, interchangeable velcro flag patch, removable heavy duty PWC lanyard D-ring, PLUS the rear race collar attachment.

LADIES TOUR COAT

The Jettribe Ladies Neoprene Tour Coats are designed for those chilly days on or off the water.

- Made as additional overlayer to help keep your core temperature high, primarily in your chest area
- · Custom cut to contour to a woman's physique
- Protects from water splashes while on your ski and the cold, high winds when flying across the water at 80MPH
- · Oversized cut to be worn over the life vest and wetsuit
- · Pre-Curved elbow joints for added comfort and flexibility
- Proprietary compression process makes 5mm neoprene until 3.5mm for a lighter feel and better cold protection
- Bold and oversized graphics are printed by gas fusion process, so material is soft and light to the touch without cracking or fading

INTERLOCKING STITCH

STYLE COLOR #JTL 18444-TL Teal \$39.99 USD

With UV Protection, breathable and quick-drying, the Jettribe Rashguard is constructed with 20% Spandex and 80% polyester fabric, which provides lightweight, stretchy, and easy movement for riding PWC and other water activities. The ladies custom cut comfort fit and design offers the ultimate warmth and sunburn prevention for hours of PWC riding.

FLAT LOCK STITCHING -

Flatlock stitching is an ideal stitching style for watercraft riding gear. The parallel stitching method is perfect for riding gear due to its strength and flexibility. Open to water penetration, the unique seam offers high performance and fast drying times, that complement the rashguard's light, breathable fabric. Count on flatlock stitching to keep your long or short sleeved guard wearing great every day. The tight fit provides optimal staying power on even the roughest waters.

The Jettribe Rashguard's fade-resistant coloring and design is made to enhance your time on the water. Make the most out of your next ride with this high performance and comfortable rashguard.

LADIES SMOOTH RIDER FULL SUIT

The Jettribe Ladies "Smooth Rider" Full Suit is custom cut for a woman's physique, and designed for an all-around rider's maximum comfort, flexibility, warmth and mobility.

- · Built with 2.5mm panels for both high movement and warmth
- · All seams have a interlocking flat stitch to provide a watertight seal and maximum comfort against the skin
- · 4-way stretch neoprene for comfort and maximum flexibility
- · Carefully selected and super soft neoprene for the right combination of thickness to retain a rider's body heat in various conditions
- · Ideal for late fall to early spring riding
- · Pattern cut for a female rider's natural riding position
- · Reinforced knee panel to prevent wear and tear on the suit and the body
- · Silkscreen graphics designed to hold up to frequent water use
- · Rear zipper entry with marine grade zipper and pull string

proprietary Gen II Fade and Sun resisistant Nylon!

Weather and Water Resistant Generation II Nylon with 3 layers of PU coating underneath.

reinforced with tough

Ballistic Nylon material

Not available for all crafts.

Thank you for checking out one of the best PWC covers on the market today. For over a decade Team Jettribe USA racers and professional racers all over the world have relied on Jettribe PWC Premium covers to protect their race skis while traveling thoughout the United States and abroad. Besides racers, watercraft enthusists rely on our Jettribe PWC covers to protect their skis while in storage or trailering to their favorite riding spots. For over a decade, Jettribe covers have been known for their quality and durability.

Jettribe premium covers offer the most water resistant, water repellant weather protection for your watercraft, plus our covers are specially built for trailering. Here are some cool features that set our PWC covers above the rest. We added four 1.5" webbing detachable tie downs, plus we ran shock cord bungee all around the bottom leading edge. For weather resistance, our materials are specially UV coated with the exclusive (CFM) material that is formulated only for Jettribe! It took us nearly two years to figure out the formulation! For water resistance the material is coated with three layers of clear PU or PVC backing to keep out the water. All our seems are triple-stitched and finished off with binding. No exposed seams! The inside hood area is lined with soft nytex material to protect your PWC from getting scratched paint. All pin or eye bow areas are reinforced with a tough extra layer of Nylon material. When fueling up, most of our covers have a gas flap opening. Talk is talk, but seeing is believing. Check out our Jettribe covers at your local dealership. Jettribe Covers are a perfect quality, fit, finish, and a true work of art!
